Track Claws are reusable, quick
 connect traction devices that
 require no welding or cutting.

Their unique "V" design provides penetrating traction while minimizing side
 slippage for improved safety.

Track Claws can be installed in minutes using only a ratchet and socket. No
 pad bolts are used in the installation - they bolt through the clean out hole using
 a special bottom plate (included) and a zinc plated grade 8 bolt.

Durable and reusable, Track Claws are made of higher grade material than
 track pads. Then they are heat treated
 creating a durable product that can be
 reused many times.

Track Claws are available for all popular
 styles of track pads including single,
 double and triple grouser bar styles. For
 pads without cleanout holes, a template
 will be provided.
